

THE EXCLUSIVE GOLD RANGE OF ADVANCED HEATING PRODUCTS

The hugely successful, exclusive range of Gold heating products have been developed after years of research and experience and designed for quality, reliability, power and exceptional value for money.

THE POTTERTON GOLD BOILERS RANGE

Offering unrivalled efficiency at unbeatable prices, the exclusive Potterton Gold boilers are now available in a range of 6 styles and 18 models including the award winning HE Combi. The powerful, ultra efficient Potterton Gold boilers are packed with added features and have fast become Britain's favourite boiler.

THE GOLD UV CYLINDER RANGE

The unbeatable Gold UV Cylinder range creates a new standard in unvented water storage and designed with performance in mind. Manufactured from highest quality Duplex stainless steel, the Gold UV Cylinders are available in an extensive range of 5 styles and 34 models.

THE GOLD TRV RANGE

The new Gold Thermostatic Radiator Valve range is both a stylish and ultra reliable addition to the Gold Range of products. With a range of 3 styles and 8 purpose built designs, the Gold will fit every need and, as with all Gold products, is supplied with a full Two Year Guarantee.

THE GOLD CIRCULATOR PUMPS

The Gold Domestic Circulator Pumps are available in 3 models, offers the ideal solution to most secondary hot water service applications and although they have been designed especially for the Gold System of products yet will replace all existing pumps.

THE GOLD IN-LINE FILTERS

Available in 2 sizes, the superb Gold In-line filters removes contaminants from the system and contains them safely within the filter unit, are recommended for use with the Potterton Gold boilers and are fully compatible with all heating systems.
